The 2020 Fraud Prevention Checklist:

Protecting Your Business in Six Steps

Fraud is everywhere; to the point where the word is almost overused. However if anything – fraud is more of a threat than ever. According to the 2019 AFP Payments Fraud and Control Survey, 82 percent of companies were targets of payments fraud.

Statistics to Know

According to the Association for Financial Professionals (AFP) 2019 Payments Fraud and Conrtol Survey:

64% of attempted or actual payment fraud attacks resulted from actions of an individual outside the organization

80% of organizations experienced Business Email Compromise (BEC)

Payment fraud has increased 20% since 2014

What can you do?

Here's the Rockland Trust 2020 Fraud Prevention Check List to help you better protect your business. We break this into six parts:

- Check Controls
- Payment Processing
- Reconciliation Reminders
- Deposit Diligence

- Online Overview
- Business Basics

Where Each Relationship Matters®

Check Controls Keep it Safe – Locking up your checks is the easiest way to secure them. Have a System – Who creates them, who signs them, who reorders them. Review this often and ensure the right internal controls are in place.

- Get a Style If you have multiple accounts, choose a different look for each to limit confusion for your team.
- Give Updates Be sure to notify your financial institution if you have a change in authorized signers.
- Implement Tools Most financial institutions have tools that help guard against fraudulent check activity. Positive Pay will compare your issued checks against checks presented for payment, and flag any differences for review. Click here to view a demo.

Payment Processing

- Securing Bill Payments Replicate your internal controls as you would for paper checks. Ask your financial institution if dual approval, user access and limits are available.
- ACH Payments Practice dual control and verify ACH account information with a pre-note. Always secure recipient authorization for all payment types and be sure to follow NACHA guidelines.
- ACH Debits Use tools such as Positive Pay to filter and/or block unauthorized ACH transactions.
- **Wires** Utilize dual control and validate account information before wire payments are sent.
- Recipient Data Changes Set up a procedure (secret code, verbal confirmation, etc.) with your recipients to validate new account information for all payment types prior to sending the payment.

Reconciliation Reminders

- **Do it Daily** There are several channels that will allow you to review your accounts text, online, mobile. Try to look at your accounts daily.
- Alerts Alerts are a good way to manage balance, activity, payments and security of your accounts. Create a system that makes it easy for you to monitor your account activity.
- Match it up Make sure your payments are posted correctly.
- Reconciliation Tools Generate daily/weekly/monthly reconciliation reports for full account, deposit, and check activity. Contact Rockland Trust to set up Account Reconciliation.
- Sound the Alarm If something doesn't look right, report it immediately.

Deposit Diligence

- Remote Deposit By depositing checks directly from your location, you can keep your deposited items secure, save time and avoid employee travel expense and liability.
- Consider Lockbox Centralize, automate and expedite a secure collection of your receivables with a lockbox service.
- Make it Mobile Deposit checks directly via your mobile device.
- Account Segregation It is recommended to segregate certain transactions from your operating account, such as credit card processing, payroll and incoming wire activity, to avoid unnecessary fraud exposure.

Online Overview Business Basics ☐ Training – Train all employees on a regular and consistent basis. ☐ Sharing is Not Caring – Use strong user credentials that are **Email Safeguards** – Be aware of emails that note a change of unique and only available to you. financial data, attachments, links, unusual content and requests. ■ Dual Control – Set up company-wide dual control for ACH and Validate before you act! wire transactions, bill payment and Positive Pay services. **Email Phishing Tests** – Execute simulated phishing tests for an Designate Proper User Authorities – Assign user access effective tool to train your first line of defense.
